ORCHESTRATED BY

DATA MASTERCLASS
THE FIRST TRACK FOR DATA & AI LEADERS

Borek Data Ventures UG (haftungsbeschränkt), Berlin • “Borek Data Masterclass”® registered EU trade mark • “Sovereign Agentic OS”™ application no. 019387411

EUROPE RUNS ON AI IT DOES NOT CONTROL.

Adoption is constrained by dependency, risk and speed.

01 SOVEREIGNTY RISK

Core AI capability sits with non-EU platforms. Data, prompts and IP leave the jurisdiction.

02 PILOT PURGATORY

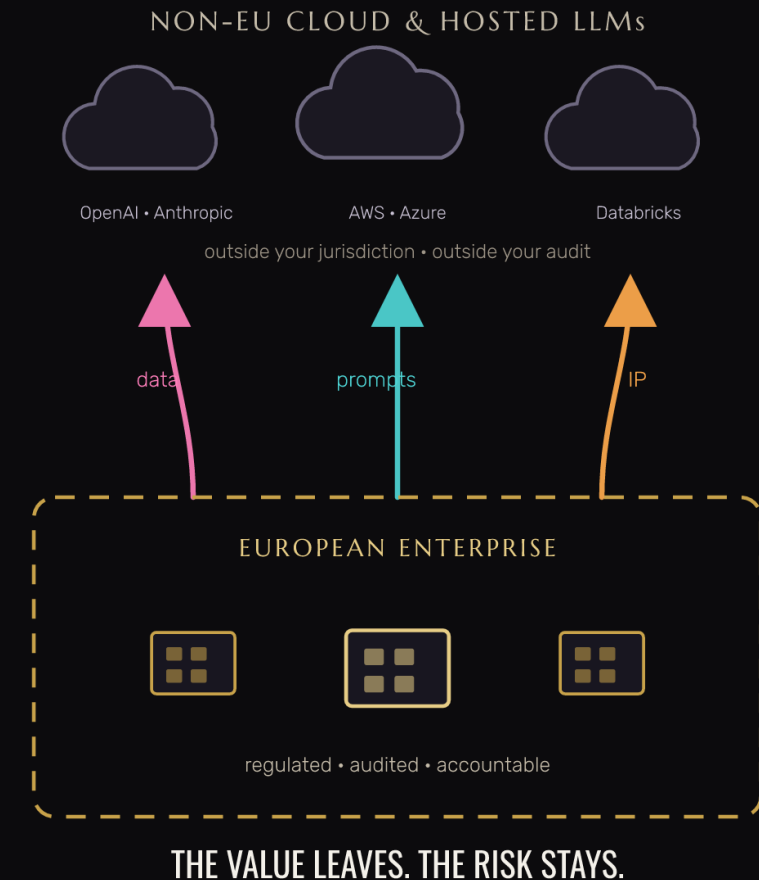

Dozens of pilots never reach production: no governance, no lineage, no operating model.

03 FRAGMENTED TOOLING

Every company re-assembles the same two dozen tools by hand – months before the first agent.

04 CAPABILITY GAP

The scarce resource is not models – it is leaders who can govern AI in a real organisation.

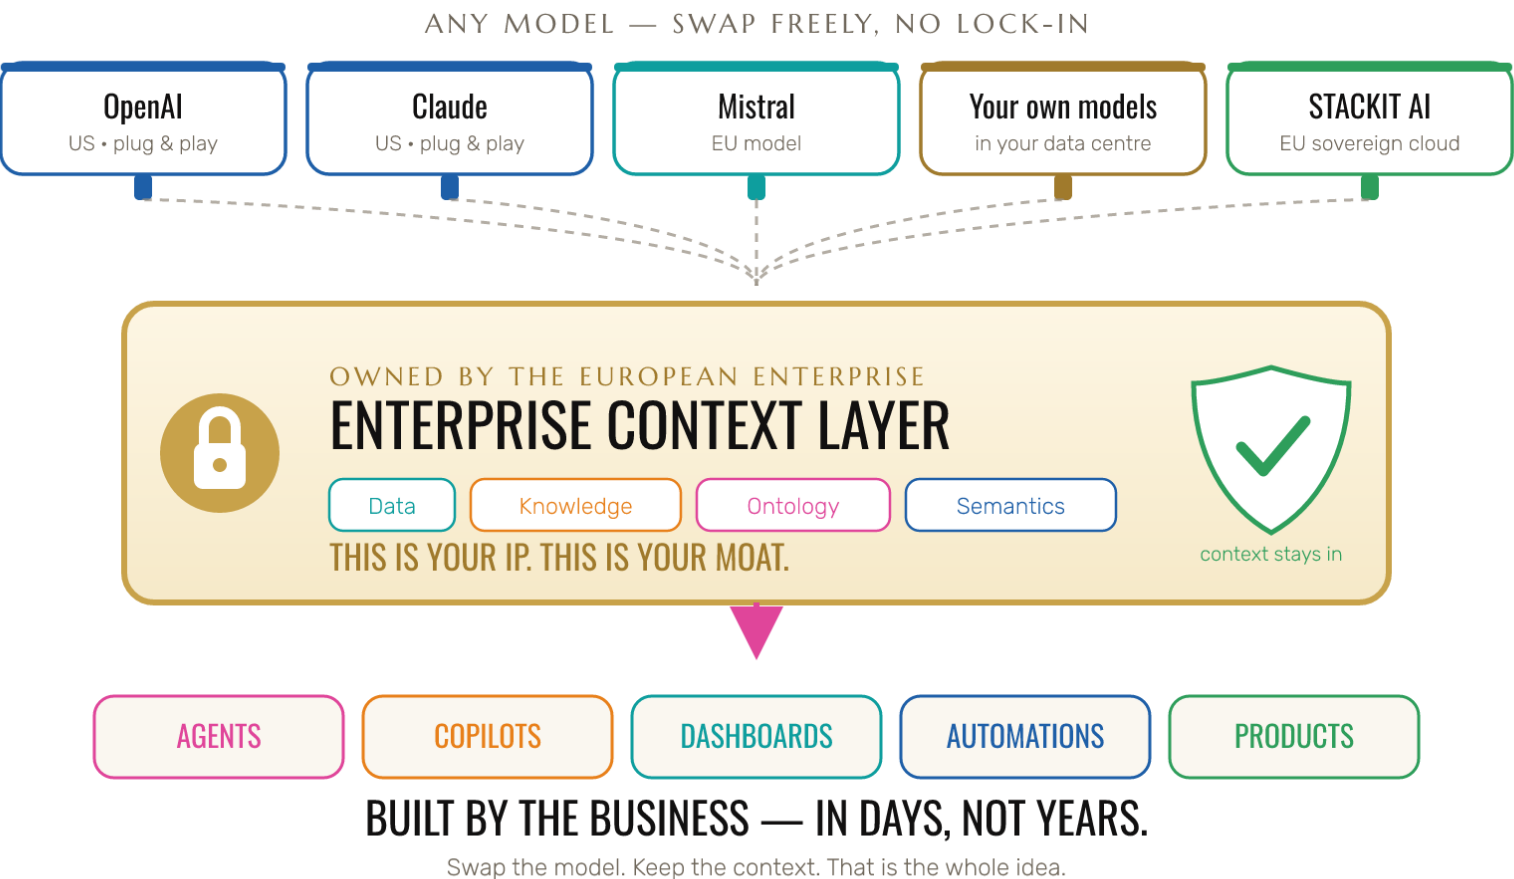

THE CORE IDEA

OWN YOUR CONTEXT LAYER. RENT THE MODELS.

Models are becoming a commodity you can swap. Your context is not – it is your IP.

THE WARNING

Palantir’s CEO warns that AI giants can extract a company’s structure and ontology – even when contracts forbid training on your data. The derivative is not covered by the NDA.

**Build your own ontology.
Run AI on your terms.**

WHAT WE BUILD

A leading Enterprise Context Layer – so the business assembles AI applications plug & play, with any model, at speed. Piloted on STACKIT, the EU sovereign cloud.

ADVANCE ENTERPRISE AI TRANSFORMATION IN EUROPE — **HOLISTICALLY.**

Technology alone does not transform a company. We combine an open sovereign platform, a partner marketplace and a leadership ecosystem — so European enterprises get the software, the services and the people capability from one aligned source.

WHAT THAT MEANS IN PRACTICE

RUN AI AGENTS ANYWHERE

Cloud, EU-sovereign infrastructure, or fully on-premise — data and inference never leave your jurisdiction.

ADOPT IN WEEKS, NOT YEARS

Governed agentic AI and data practices are built in, with UX designed for real adoption.

KEEP THE EXIT OPEN

Permissively licensed open source end to end. No closed core, no lock-in, fully auditable.

THE OPPORTUNITY

**A European alternative
that is not a compromise:
sovereign by design,
faster to adopt,
impossible to lock in.**

Built as an open alliance from Europe — for the world.

SOVEREIGN AGENTIC OS — ONE GOVERNED STACK.

About two dozen best-in-class open-source tools, assembled into one governed platform that runs on your Kubernetes.

SOVEREIGN

Reference deployment on STACKIT, the EU sovereign hyperscaler – and portable to any cloud, your own data centre or fully air-gapped.

FAST

One Helm chart, one command. Governance, lineage, RAG, lakehouse, BI and CI/CD arrive already wired together.

ZERO LOCK-IN

Apache-2.0 core including the UI. Every component Apache / MIT / BSD / PostgreSQL. Fully auditable and yours to modify.

WHAT THIS CHANGES ECONOMICALLY

AI foundation investment drops from millions to hundreds of thousands – while moving faster.

AND WHO CAN BUILD

Complex multi-agent systems built by business people in days instead of months.

RETRIEVAL AGENT
finds the right context

ANALYST AGENT
queries the lakehouse

BUILDER AGENT
ships governed software

GUARDIAN AGENT
enforces policy

YOU
stay in control

ONE GATEWAY · ONE POLICY ENGINE · ONE AUDIT TRAIL

A GOVERNED DIGITAL WORKFORCE — RUNNING WHERE YOU DECIDE.

ONE INTEGRATED PRODUCT. **INSTALLED IN HOURS.**

Enterprise AI platforms usually mean a year of integration work. This one behaves like a product you simply switch on.

EVERYTHING INTEGRATED

Agents, knowledge, data, dashboards, software and governance live in one themeable web app — not two dozen disconnected consoles.

INSTALLED IN HOURS

One command brings the whole platform up, self-contained, with demo data and logins.
No external service, no API key.

BUILT FOR BUSINESS USERS

Proven in a hackathon at an automotive supplier: business users with little technical background built complex agent systems in a day.

“AI FOUNDATIONS OUT OF THE BOX — FOR EVERYONE.”

Great UX is not cosmetic: it is what turns a sovereign stack into a head start for every European company.

SEE IT WORKING — THREE DEMO VIDEOS AND THE FULL SOURCE

Introduction to the OS

Apache-2.0

INDUSTRY-SPECIFIC AGENT SYSTEMS — OUT OF THE BOX.

A general platform becomes ready-made, sector-specific agent systems — and our founding partners take it to production scale.

Automotive

Manufacturing

Logistics

Finance

Retail

Insurance

WHAT OUR FOUNDING PARTNERS CONTRIBUTE

Enabler Minds

Makes the platform robust, scalable and available as a managed service — with easy integration into SAP, Microsoft Azure, Salesforce and other enterprise systems.

NexgAI

Brings the methodology and the highly complex multi-agent systems that lift the agent OS and context layer to an internationally leading level.

THE COMMUNITY BUILDS THE BLUEPRINTS

Leaders apply the OS in their own sector. What works ships as an industry system.

ONE GOVERNED STACK — BUILT AROUND OUR CORE.

Every capability portable and governed: one model + tool gateway, one policy engine, one trace across all of them.

SOVEREIGN AGENTIC CORE

OUR SECRET SAUCE

The glue: orchestration, the business UI, the MCP layer and the enterprise context wiring — our IP, Apache-2.0.

AGENT RUNTIME

Agent orchestration • model & tool gateway • retrieval • full tracing

FOUNDATIONS

Policy engine • document intelligence • pipelines • semantic layer • catalog

SELF-SERVICE

Query engine • lakehouse • BI • Git • CI/CD • business workbench

SCIENCE

Notebooks • experiment tracking • feature store • model serving

SHARED INFRASTRUCTURE

Databases • analytics store • cache • object storage • table catalog

Reference implementation on STACKIT (EU sovereign hyperscaler) — same Helm chart on any cloud, on-premise or air-gapped.

AGENTIC GOVERNANCE

Governance runs as agents — not as a policy PDF.

Security agent

secrets, egress, access

Quality agent

data & output validation

Monitoring agent

cost, drift, incidents

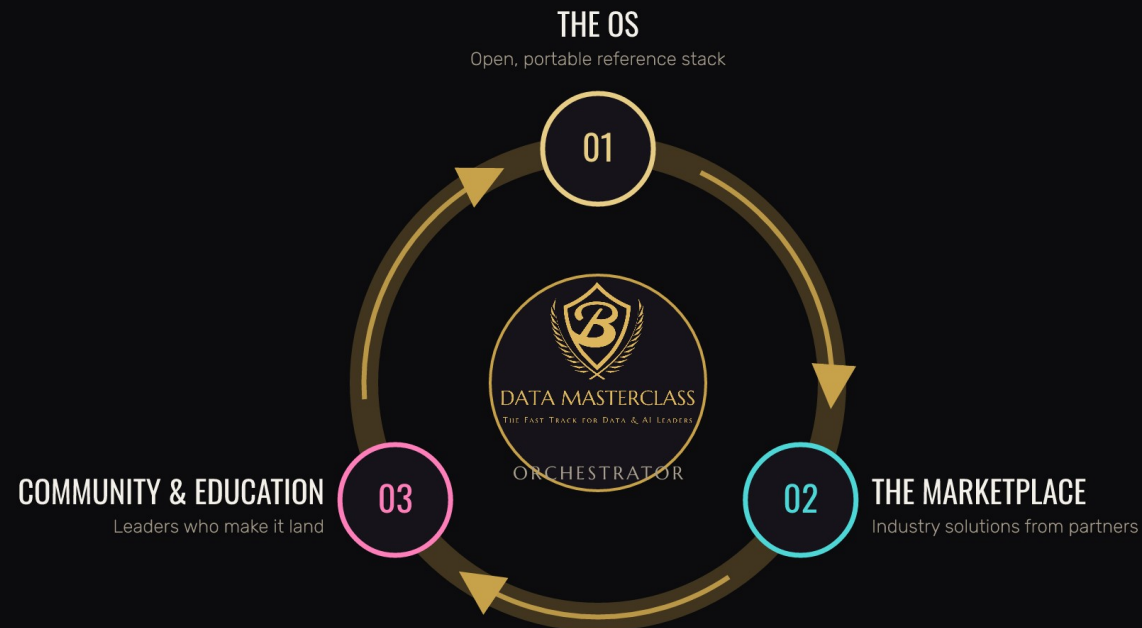

EU AI ACT

Risk class, technical documentation and audit evidence generated automatically.

PLATFORM, MARKETPLACE, AND PEOPLE.

Three pillars that reinforce each other — the reason adoption actually lands inside an enterprise.

EACH PILLAR FEEDS THE NEXT — THAT IS THE FLYWHEEL.

ALREADY RUNNING WITH EUROPEAN ENTERPRISES.

3

Enterprise pilots,
each >€100M revenue

33

Data & AI leaders in
the first cohort

500+

Leaders in the community,
100 companies

12+

Alliance partners
contributing

FIRST ENTERPRISE PILOTS

Financial services

Berlin, Germany

Regulated environment; data residency and a full audit trail are non-negotiable.

E-commerce group

Netherlands

High-volume data estate; agentic self-service across business domains.

Automotive supplier

Düsseldorf, Germany

On-premise and shop-floor constraints; IP must never leave the perimeter.

The first Agentic AI Leader cohort — building on the platform

EMBEDDED IN A NETWORK OF 500+ LEADERS.

The platform does not launch into a vacuum — it lands inside an existing European community of practitioners.

Data Masterclass Europe — the annual gathering of European Data & AI leaders

Coaching sessions with members — where platform feedback comes from

500+

Senior Data & AI leaders
across Europe

100

Companies represented

33

Leaders in the first cohort

A COMMUNITY THAT ALREADY SPANS THE CONTINENT.

Ten city chapters run today, with more planned — this is the distribution channel that carries the platform across the EU.

THE AGENTIC AI LEADER PROGRAM.

Our education pillar in practice — and the fastest channel for platform adoption.

33

leaders in the first cohort

Sold out

2nd cohort Q4 2026 — 33 more
leaders

12

weeks, live and hands-on

631

SIX MODULES — ONE PER DIMENSION

01 Agentic Strategy

02 Agentic Foundations

03 Agentic Big Bets

04 Agentic Self-Service

05 Agentic Organization

06 Certification

The first cohort — 33 Data & AI leaders from European companies

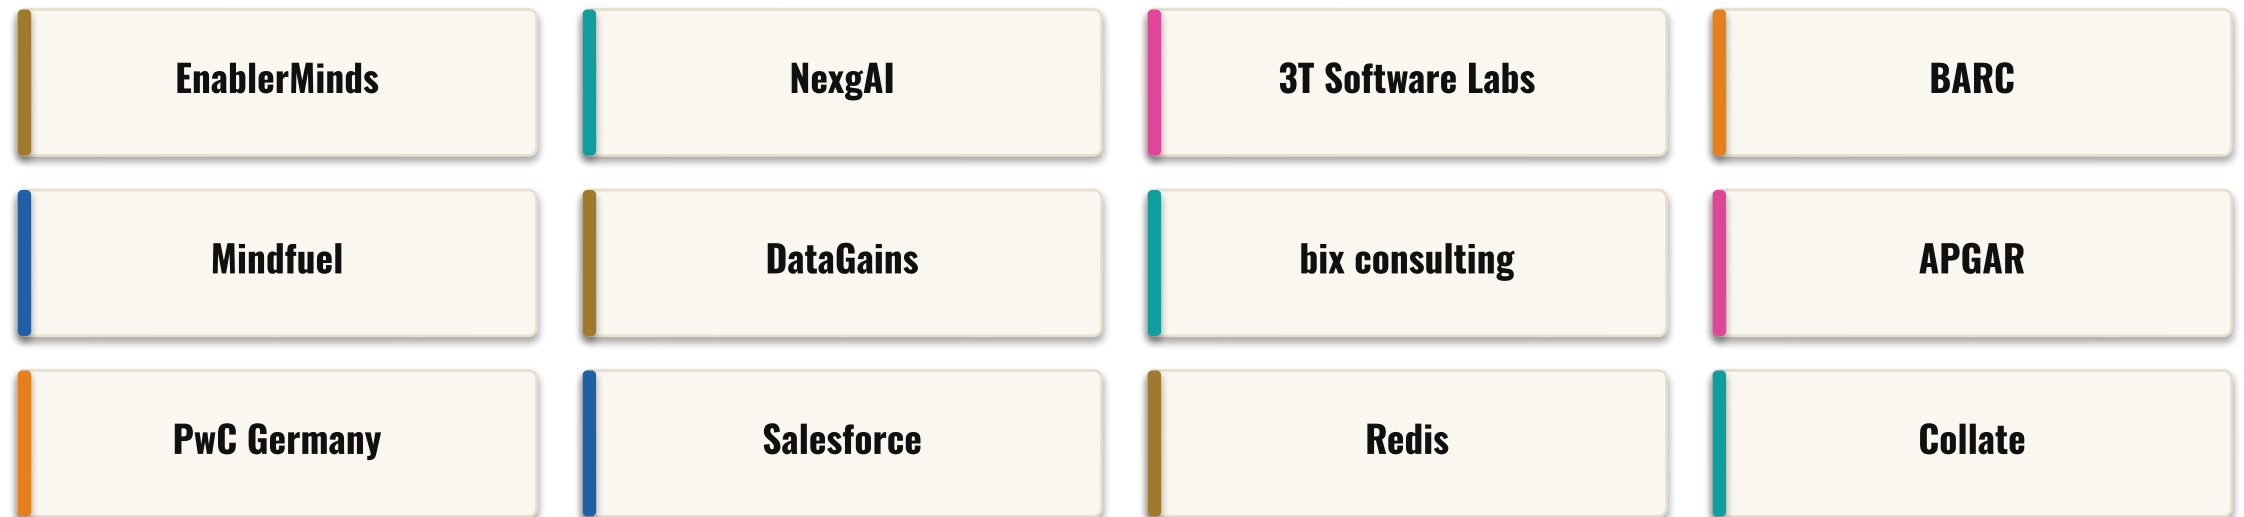

Taught by former and current leaders from Microsoft, Volkswagen, Zalando, GotPhoto, Disney+ and HelloFresh — every cohort is a pipeline of platform adopters.

BUILT TOGETHER, **NOT ALONE.**

An open alliance of European technology and consulting partners contributing to the platform and the marketplace.

Partners contribute components, integrations and delivery capacity – and list solutions in the marketplace.

Open governance – permissive licensing, a public roadmap, and a marketplace open to any European solution provider.

THE TEAM

A CORE TEAM PLUS EUROPEAN FOUNDING PARTNERS.

CORE TEAM · DATA MASTERCLASS

Dr. Alexander Borek

Founder & CEO

Former Director Data Analytics at Zalando SE and Global Head of Data & AI at Volkswagen Group. Four books, PhD Cambridge.

Aleksejs Plotnikovs

Chief AI Officer

Former EMEA Data & AI Director at Microsoft. Leads technical direction and architecture of the OS.

Marina Borodina

Senior Community Manager

Runs the 500+ member community, the programme cohorts and member success.

FOUNDING PARTNER LEADERSHIP — MAJOR TECHNICAL CONTRIBUTORS

Hitesh Sahni

Co-Founder, CTO & MD · Enabler Minds · Cologne

Former Head of Cloud Data Platforms at DHL Group. Brings enterprise data-platform engineering at group scale.

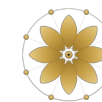

Priti Padhy

Founder · NexgAI · London

Former CTO at KPMG and Global Director Data & AI at Microsoft. Runs large-scale multi-agent systems delivering millions in benefit, recognised by Gartner as world-leading.

Plus a coaching network of senior practitioners — Microsoft · HelloFresh · Thoughtworks · Zalando · Allianz · Disney · GotPhoto

PROPRIETARY RESEARCH — APPLIED, NOT SOLD AS REPORTS.

Among the few in Europe investing this depth in practical research — applied, not sold.

2,500+

pages of own research decks

6

deep enterprise blueprints

5+

large enterprises per blueprint

2023

building this since

SIX BLUEPRINTS — EACH APPLIED IN 5+ LARGE ENTERPRISES

Data Products	Semantic Layer
Self-Service Analytics	Agentic AI
Data & AI Strategy	Data & AI Organisation

APPLIED WITH EUROPEAN ENTERPRISES

C&A	Deutsche Bahn	Kiepert AG
Heraeus	Fiege	Swiss Post
Redcare Pharmacy	Europace AG	Merck
Valora	Wepa	LKW Walter
Scout24	Sparkassen Rating	

Members take these frameworks and apply them directly — they shape real enterprise decisions. The platform now encodes that research in software, so the blueprint ships with the product instead of sitting in a slide deck.

SKYROCKETING EUROPEAN AI

**SOVEREIGN
AGENTIC OS**

Let's build Europe's agentic foundation.

Join the alliance — build on the OS, list in the marketplace, or bring your
leaders into the programme. The core is open and free, today.
